

ARNAB MONDAL

Full-Stack Developer

Chambahati, West Bengal, India | +91 93394 21756 | mail@arnabmondal.in | github.com/ARNAB-BOTMAS

PROFESSIONAL SUMMARY

Full-stack developer with experience in enterprise software delivery at Tata Consultancy Services, spanning web, Android, and backend development. Proficient in Java, Python, C/C++, JavaScript, React, and Node.js, with hands-on work across relational databases and cloud-hosted platforms. Comfortable operating within team-based delivery workflows and client-facing systems.

TECHNICAL SKILLS

Languages: Java, Python, C++, C, JavaScript, PHP

Web & Mobile: React JS, Node.js, HTML5, CSS, Android

Data & Platforms: MySQL, PostgreSQL, Firebase, GitHub

PROFESSIONAL EXPERIENCE

Assistant System Engineer — Tata Consultancy Services Jun 2026 – Present

- Promoted from Programmer in recognition of consistent performance and delivery.
- Continue to work on live client projects with growing ownership over delivery.

Programmer — Tata Consultancy Services Jun 2025 – May 2026

- Promoted from Graduate Trainee after completing the graduate trainee program.
- Contributed directly to feature development and delivery on live client projects.

Graduate Trainee — Tata Consultancy Services (TCS Indore Campus) Jun 2024 – May 2025

- Completed TCS's graduate trainee program, ramping up on enterprise development practices, delivery workflows, and client-facing systems.
- Contributed to live projects as part of an on-site development team.

PROJECTS

Srishti AI (Python): AI assistant project focused on building intelligent, algorithm-driven automation tools.

React Portfolio (React): Custom, component-based personal portfolio site with responsive layouts across devices.

React Chat App (React): Real-time chat interface focused on message flow, component state, and responsive design.

Overtime Tracker (Android): Android app for logging entry and exit times to track work hours with minimal input.

Photo Album App (Android): Android app for uploading and organizing photos with timestamps within shared albums.

Hospital Prescription App (Android): Android app for creating and sharing timestamped patient prescription records.

Weather App (JavaScript): Web app delivering weather forecasts and real-time updates.

Shop Bill System (JavaScript): Billing and transaction tool for retail shops to streamline bill generation and tracking.
